

Fogging SOP

Best Practice for Residential Homes

1. Back-to-Front

- Start with the rooms furthest from the front door.
(Bedrooms and Bathrooms)

2. Clean, then disinfect

- Once a room is completely clean, as a final step fog solution with Breezy Blue™.

3. Common Areas Last

- Work your way towards the front door of the home, fogging the common/open areas last.

**Do not reenter a space that has been fogged for 15 minutes without PPE
